

Pharmaceuticals Biotechnology Medical devices and systems

*Comprehensive delivery of construction and technologies in
accordance with GMP rules*

Since its establishment in 1991, BLOCK® has focused on comprehensive services in design, manufacture and construction of complete buildings with demanding technologies (advanced technology) and high-quality environments (cleanrooms). We also provide follow-up services and validation for these units. Some of our main focus areas are healthcare, pharmaceuticals and biotechnology, science and research, microelectronics, automotive, and other industrial buildings with cleanroom technology.

We provide comprehensive realisation of constructions and technology units in accordance with GMP rules.

Cooperation with us results in delivery of complete and functional units that offer an ideal working environment.

TURNKEY PROJECT

SOLUTIONS SUPPLIER

Turnkey projects

- Manufacturing facilities

Substances (API, HAPI),
Solid dosage forms,
Injections,
Vaccines,
Emulsions and liniments,
Sprays and aerosols,
Products for modern therapy,
Medical devices,
Radiopharmaceutics,
Veterinary products

- Development and control laboratories
- Pharmaceutical storerooms
- Laboratory vivaria

B Facility sections

C Integrated cleanrooms, technology units, and interior fittings

A RENOWNED SUPPLIER OF:

Object construction

Complete object construction including administrative, manufacturing, and warehouse spaces and their facilities.

Cleanrooms

Forclean^{GMP}
System for complete construction of spaces with high-quality environments (cleanrooms) in accordance with GMP rules.

HVAC (heating, ventilation and air conditioning)

Heating, ventilation, air conditioning, and cooling including electrical installation and control systems.

Technological distribution system

Clean utilities PW, WFI, PS, technological gases and other technological media, steam distribution, waste management, CIP / SIP stations, etc..

Technological devices

Reactors and storage tanks, filling lines, packaging lines, lyophilizers, tableting machines, homogenizers.

Isolator technology / RABS

Isolatortech
Individual solutions for isolator technology and RABS using a flexible modular system.

Laboratories

Forlab
Proprietary furniture and fittings systems for laboratories including, for example, laboratory furniture, fume hoods, laminar and microbiological boxes, etc..

Specialised furniture

Stainless steel work and perforated washing tables, stainless steel sinks, sinks, metal racking, stainless steel mobile tables, lift trucks, etc..

DIRECT MANUFACTURER

For the realisation of demanding spaces, we have developed and continuously innovate our own BLOCK® products and systems. Manufacture is carried out by our FORCLEAN subsidiaries in Slovakia and Russia.

MAIN ADVANTAGES

- + guaranteed operational security
- + long tradition and experience
- + tailored realisation
- + in-house project team, 3D projects
- + flexible construction team
- + in-house development team
- + certification
- + in-house validation team
- + low operational costs of provided constructions and technologies
- + in-house servicing

Perfect results need perfect conditions
