Creating conditions

BLOCK® is a respected multi-national group of companies operating in many countries with a history that goes back to 1991. We bring complete, functional, cutting-edge projects to fruition, with a focus on advanced technology (high-tech) and high quality environments (clean rooms).

We are design, engineering, project delivery, and implementation company with an experienced team of technicians, technologists and engineers who manage and turn project ideas into reality. We offer our customers comprehensive services in project planning, manufacture, construction and subsequent servicing. Our solutions guarantee the optimization of capital and operating costs and consistently emphasize protection of the environment.

We provide fabrications for the pharmaceutical, biotechnological, healthcare, science and research, microelectronics and automotive industries as well as for other industrial buildings utilizing cleanroom technology.

Our implementations are strengthened by our own production program. We can confine the production process in an isolator/RABS with solutions designed and manufactured in-house.

Perfect results need perfect conditions

Perfect results need perfect conditions, so it is our aim to give you the perfect working environment and conditions, upon which you can rely fully, and that will enable you to focus solely on your important work.

We believe in continuous improvement and excellence. We therefore strive to develop our products and services and to educate our staff so that we can provide you with the best and most advanced solutions on the market.

HIGHTECH TURNKEY PROJECTS

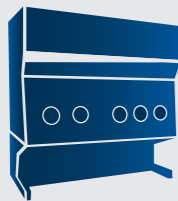

Complete deliveries of facilities, or parts thereof, for the most demanding technologies and high environment quality.

CLEANROOMS

Complex deliveries of cleanrooms. Development, manufacture and installation of built-in cleanrooms.

- GMP-compliant cleanrooms
- Cleanrooms for industry
- Cleanrooms for healthcare

ISOLATOR TECHNOLOGY

Tailor-made isolators, supply and installations of isolator technology to customer specifications.

TECHNOLOGIES

- Process technology: Delivery of technologies and comprehensive technological systems.
- Healthcare technologies: Supply of medical technologies.

BLOCK® PRODUCTS

In-house production, supply, assembly and installation of components for built-in isolators, laboratory equipment, technological equipment and special furnishings.

We deliver turnkey solutions

We complete your projects with turnkey implementation, i.e. comprehensive realisation of projects from the initial technical design, through the execution of all necessary stages of project documentation, to implementation, commissioning, measurements, testing, validation, warranty, and post-warranty service.

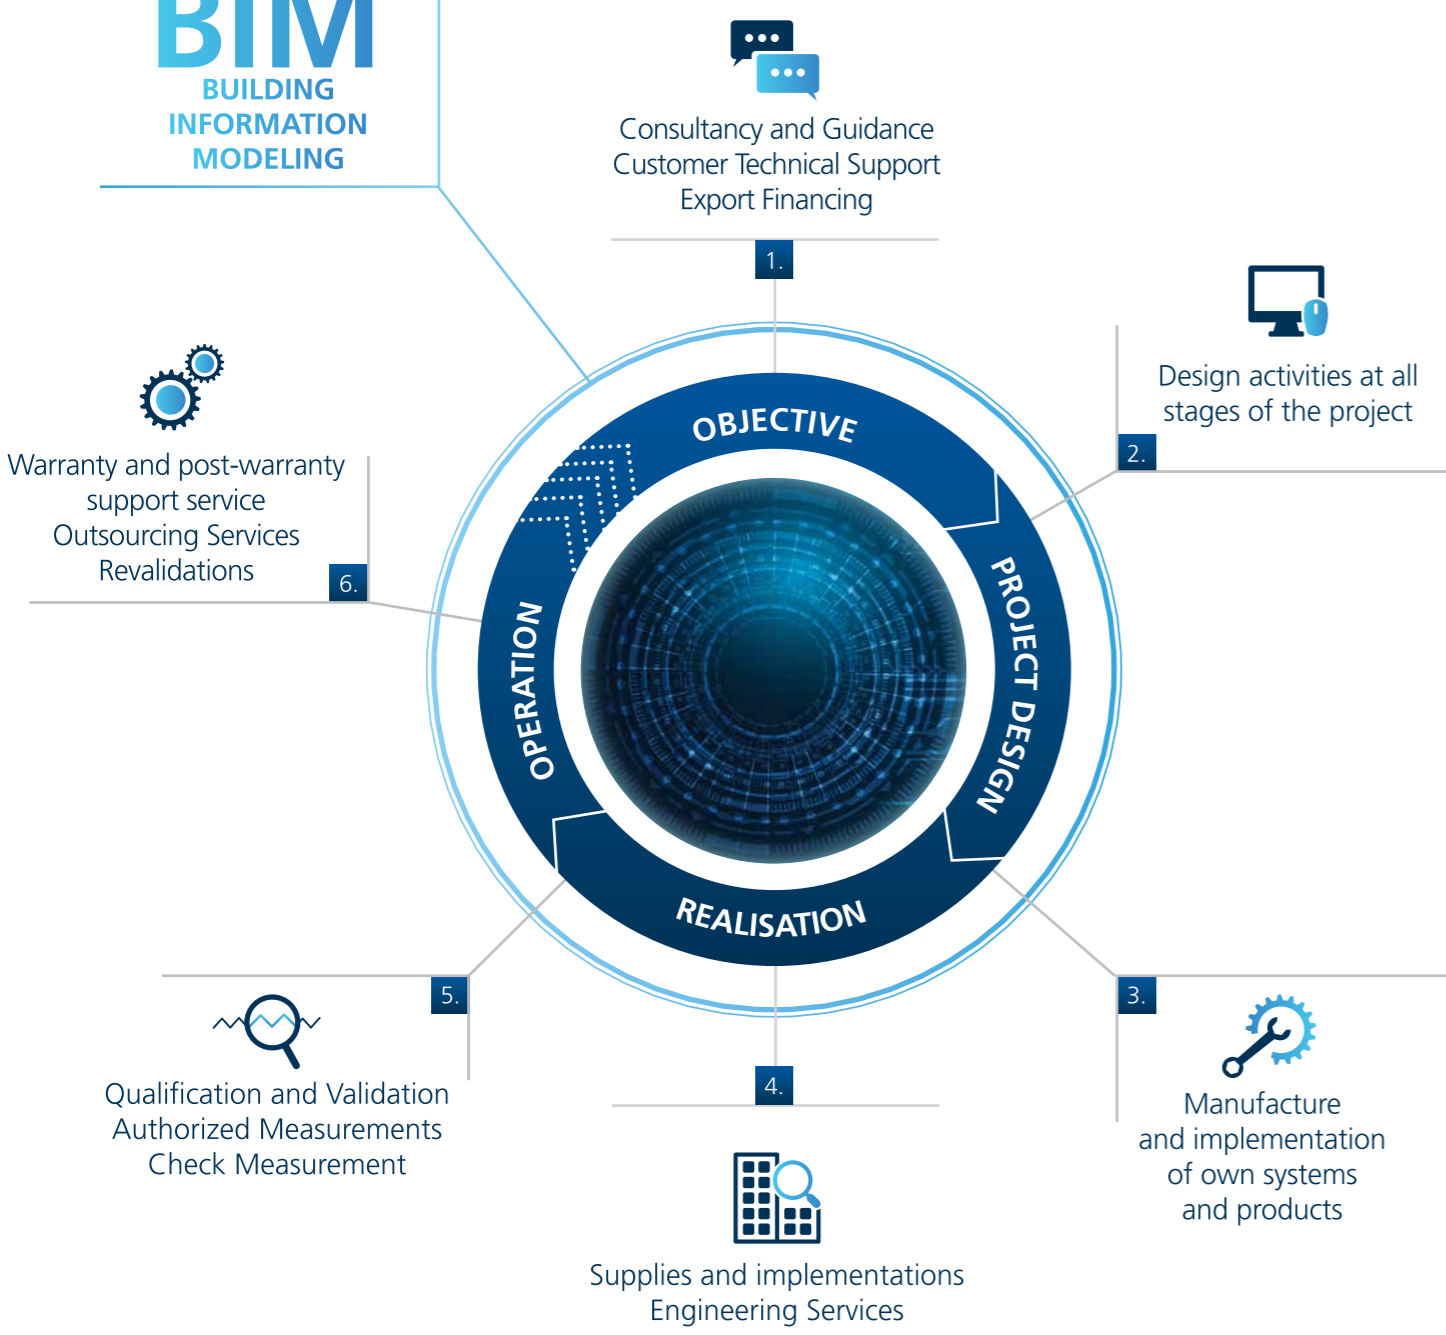

We provide

- New constructions
- Refurbishments or modernizations of existing structures
- Expansion of production capacities

We operate as

- The general contractor
- A subcontractor

We are partners throughout each phase of your project

We employ our own realization teams steeped in experience since 1991

A TEAM OF PROFESSIONALS

We have our own teams of accomplished experts who closely and flexibly work with each other: our own design, drafting and planning, development, production, validation, and service teams.

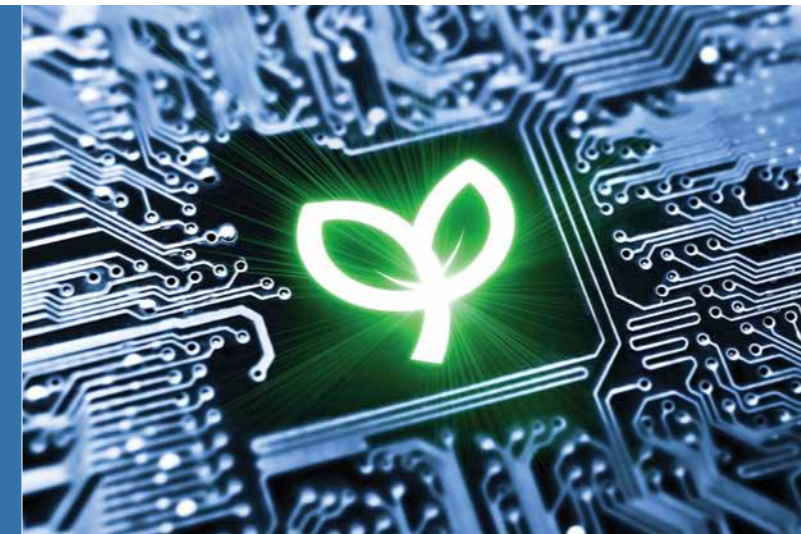

DETAIL ACCENTUATED

Processing of details is essential for rooms with high demands on environment quality. Thanks to our in-house production we are able to provide custom-made adaptations of products to specific your project requirements.

TAILORMADE SOLUTIONS

Thanks to a large TEAM OF PROFESSIONALS and our IN-HOUSE PRODUCTION we are able to respond quickly and flexibly to meet your project's specific requirements.

ENVIRONMENTAL PROTECTION

We continuously maintain and improve processes related to environmental protection. During the realization of projects we keep operational costs of our facilities low, take care in the selection of materials and we sort waste.

IN-HOUSE PRODUCTION

Our implementations are strengthened by our own production program. We have three manufacturing facilities – in the Czech Republic, Slovakia and Russia. We manufacture components for built-in clean rooms, isolator technology, technological equipment and special furnishings.

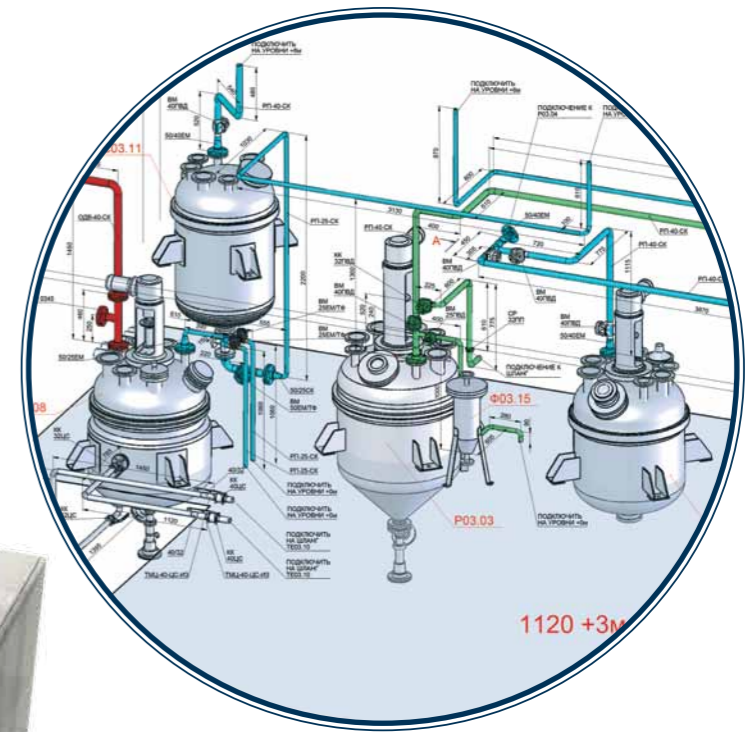

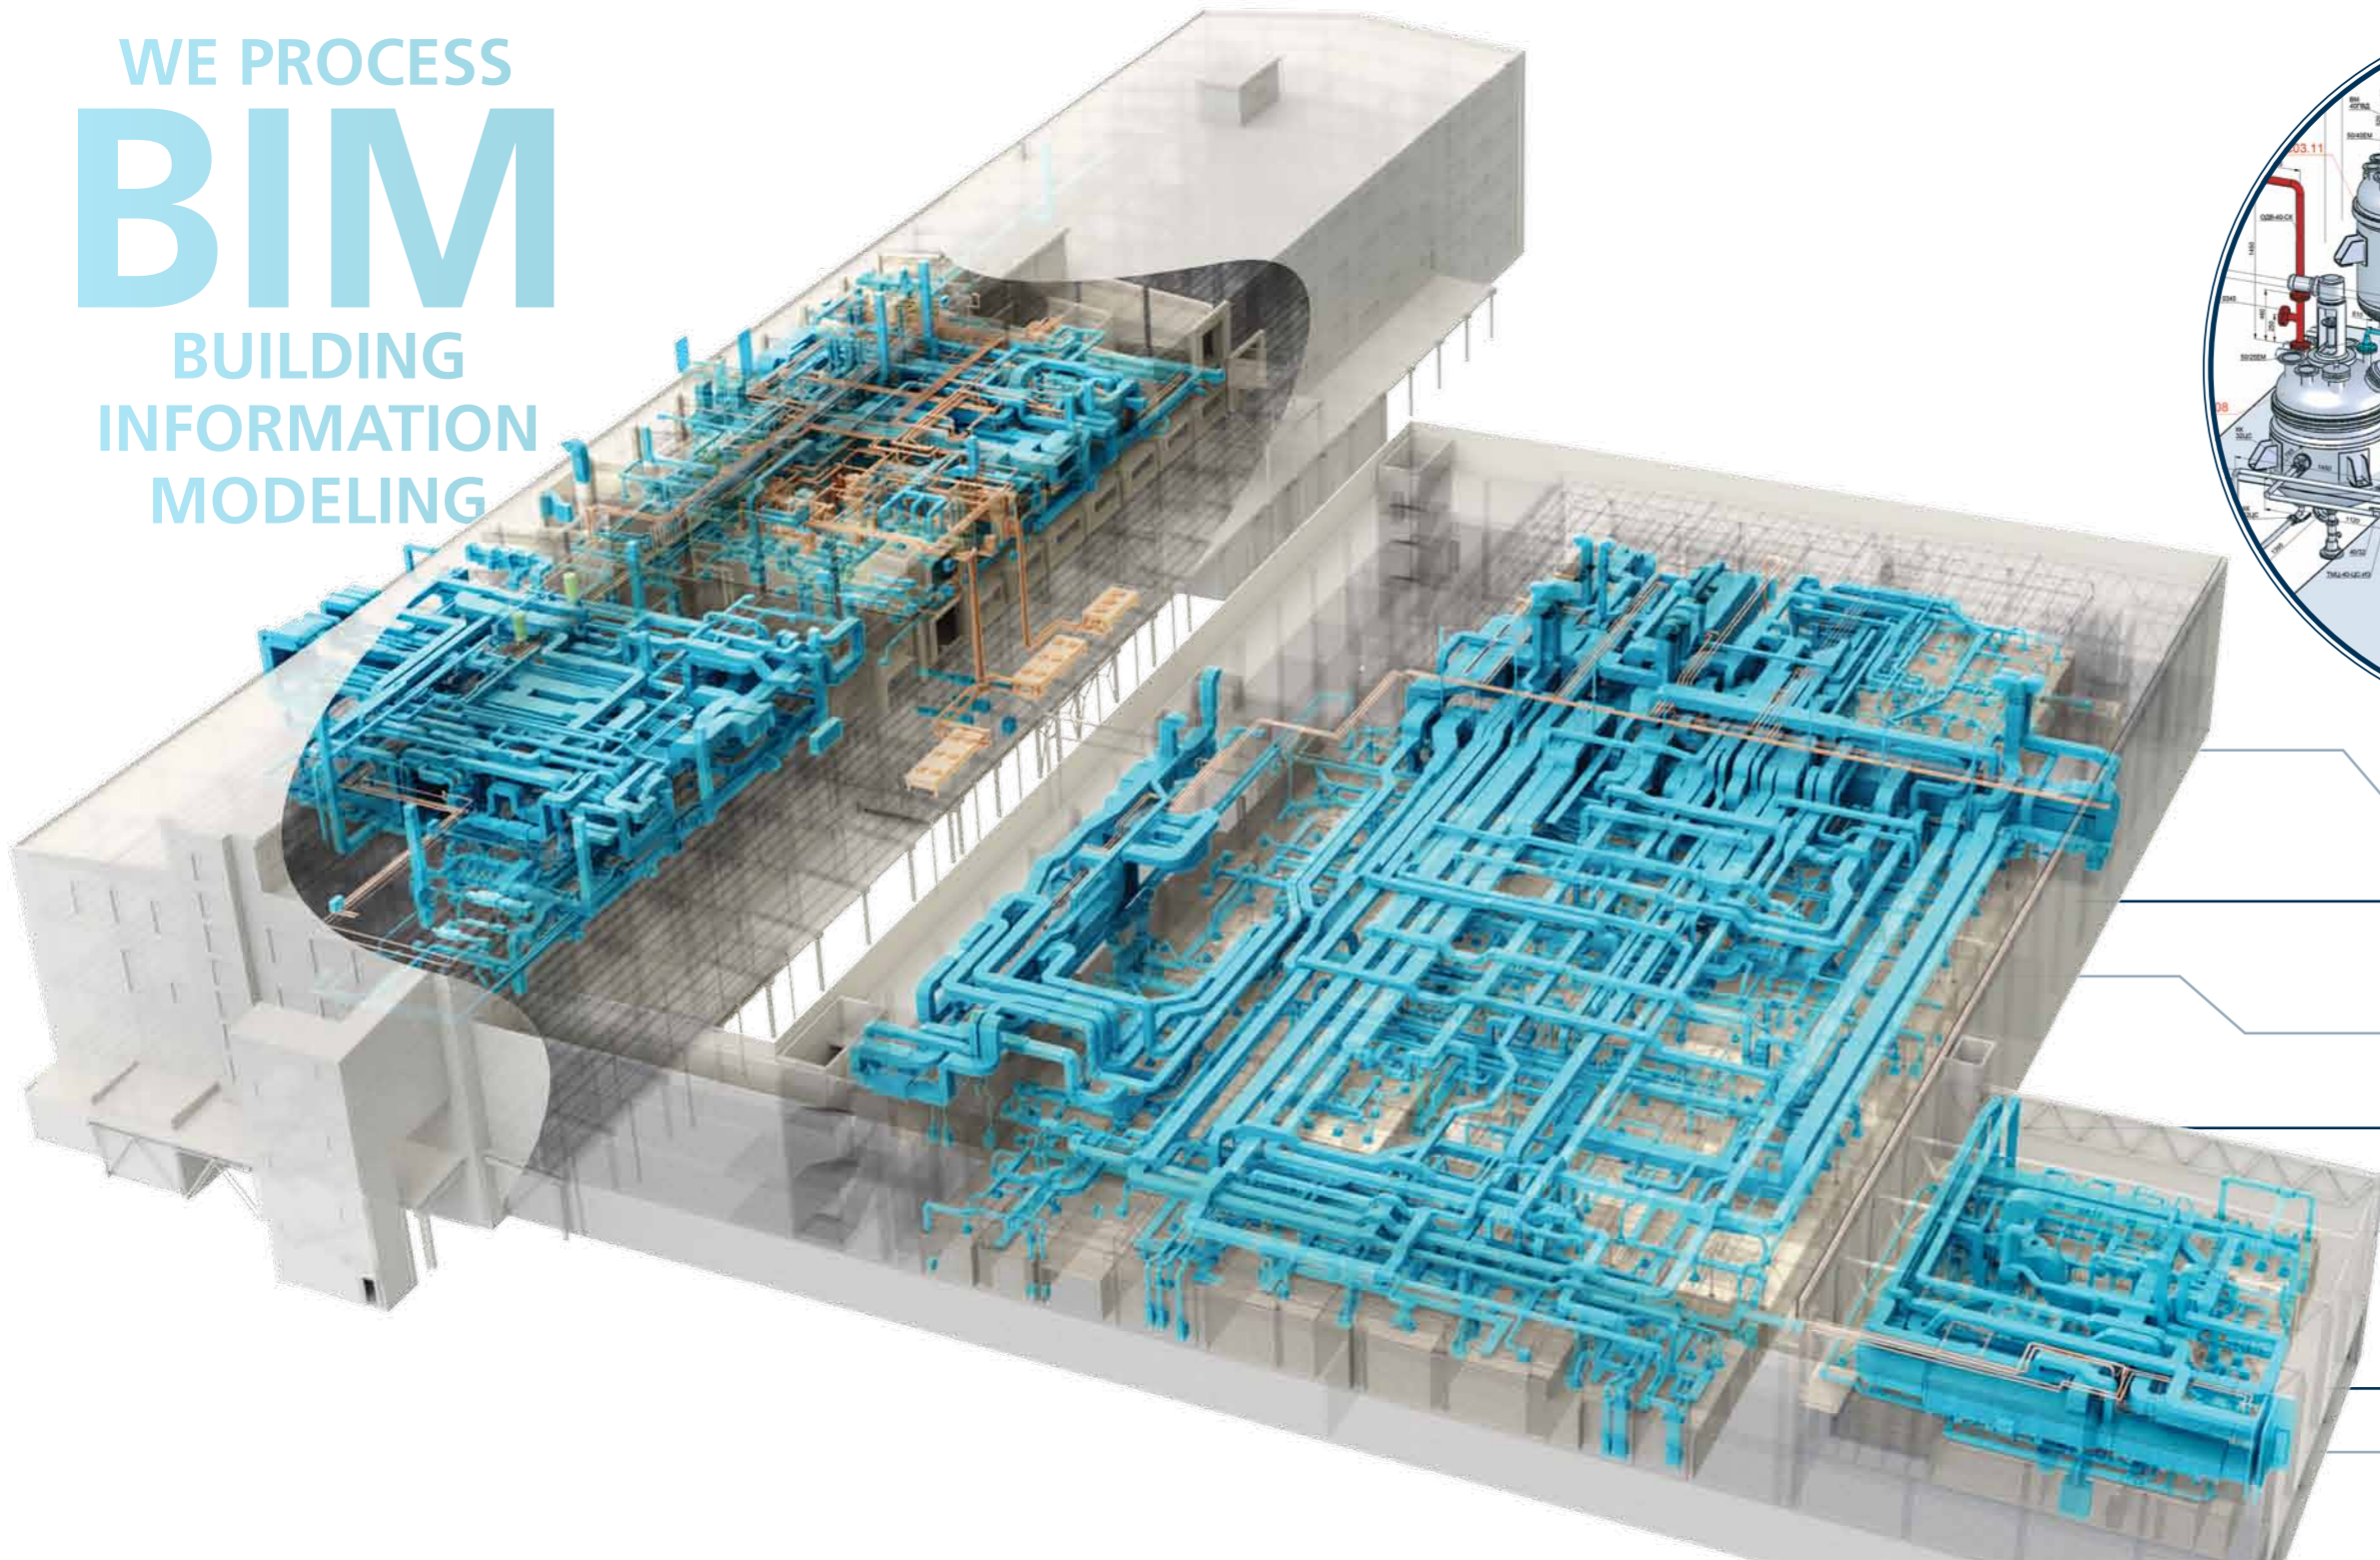

SAFETY FIRST

We observe an Occupational Health and Safety policy. We have maintained Safe Enterprise certification since 2004. The fulfilment of these requirements leads to a higher level of risk prevention in the workplace, a developed culture of occupational safety, enhanced comfort at work and higher productivity.

PROJECTS

We are a successful multi-national group

BLOCK Technical
Switzerland, Germany

- Development and innovation of BLOCK® product ranges.
- Commercial representation.

BLOCK®
Czech Republic

- Design and implementation of constructions with cleanroom technology.
- Production of isolator technology and operating theatre systems.

FOR Clean
Slovakia

- Manufacturer of systems for cleanroom technology.

BLOCK®
Russia

- Design and implementation of constructions with cleanroom technology.

FOR Clean
Russia

- Production and installation of constructions with cleanroom technology and laboratory equipment.
